Pull out Tab for high density rack

Maximize panel density

The combination of Senko's new MPO-HD's low profile and innovative pull tab allow adapters to be stacked with virtually no spacing required.

Easy to release trigger connector

The Senko MPO-HD's lever design utilizes a flexible "pull-tab" allowing for the connector to be disengaged easily from densely loaded panels without the need for special tools.

Dense applications

Because the Senko MPO-HD Connector can be removed using a simple pull tab, it eliminates the need for finger access to the MPO connectors release mechanism, in dense applications.

Features:

- A family of the SENKO "HD" Series
- Easy pull out of MPO Connector in high density rack
- SENKO Patented design
- Three available sizes
